Step OneStep TwoStep Three

Install SureTrend on any machine you wish to connect to the server **without checking the Multiuser - Distributed Network checkbox during installation.**

Start SureTrend on the client machine once installed and click on the **Admin** tab across the top. From the list of tabs on the left choose **Server Configuration Setting**.

Change the **Config Type** to Distributed and enter the Hostname or IP address of the server into the **Server** box. Click **Save** to restart SureTrend and when you've reopened it verify it is connected to the server by revisiting this area. *As shown below in Figure A.*
