

Deactivating Sites in SureTrend Cloud

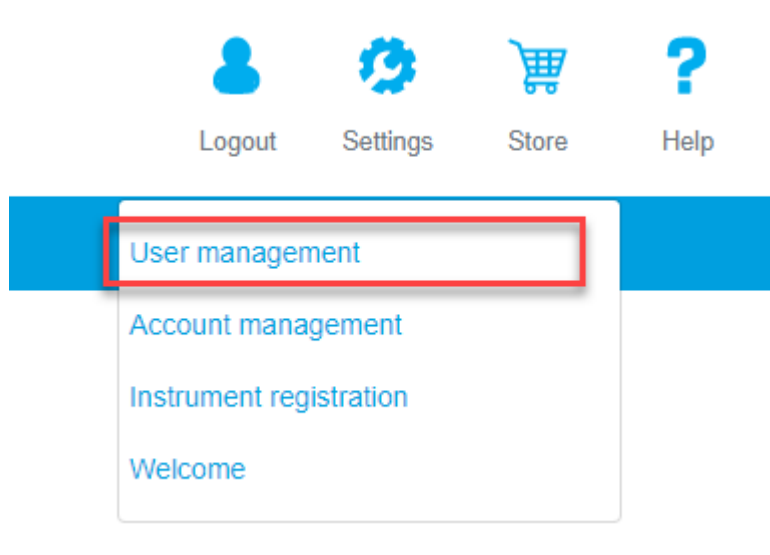

Introduction

SureTrend Cloud allows users to separate data and registered instrument by sites. You can create sites within the account management page. To disable a site, each user in the account must have their access to that site disabled before the site can be deactivated. This article will show the step by step process to deactivate a site.

Solution

Disable Site Access for Each User

1. Log into [SureTrend Cloud](#).
2. Click **Settings** and select **User Management**.

3. Click on a user in the User table.
4. Click the toggle to disable the site access for the site that you want to deactivate.

User management

First Name	Last Name	Username	Email	Roles	Active	
Spencer	Grant	sgranthyena2@gmail.com	sgranthyena2@gmail.com	Owner	<input type="checkbox"/>	

sgranthyena2@gmail.com User sites

Site	Active	Enabled
123	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Default Site	<input checked="" type="checkbox"/>	<input type="checkbox"/>

5. Repeat steps 3 & 4 for each user.

Deactivate the Site

1. Click **Settings** and select **Account Management**.

2. Click the toggle to deactivate the site.
