

# Adding & Managing Plan Locations

<b>1</b>	Randomize the locations based on randomization settings
<b>2</b>	Select Locations to include in the selected plan
<b>3</b>	Remove highlighted Locations from the selected plan
<b>4</b>	Save and commit all changes

## How plan locations can be used

Plan locations are simply locations created that are attached to specific plans. Once a location is added to a plan and you view that plan it will show all locations attached to it (its plan locations). Since locations can vary plan by plan some plans may share the same locations while others may not.
