

# Adding & Managing Plans

1	Paste plans from your clipboard
2	Add a new plan
3	Remove the selected plan(s)
4	Save and commit all changes

## How plans can be used

Usually plans are used to categorize locations or groups of locations. For example plans could be buildings across your organization, floors within a building or rooms in a building. SureTrend can hold up to 100 plans so it would not be wise to use them as the physical locations you test with a unit.
