

# Adding & Managing Plans

<b>1</b>	Paste plans from your clipboard
<b>2</b>	Add a new plan
<b>3</b>	Remove the selected plan(s)
<b>4</b>	Save and commit all changes

## How plans can be used

Usually plans are used to categorize locations or groups of locations. For example plans could be buildings across your organization, floors within a building or rooms in a building. SureTrend can hold up to 100 plans so it would not be wise to use them as the physical locations you test with a unit.
