

Adding & Managing Plans

1	Paste plans from your clipboard
2	Add a new plan
3	Remove the selected plan(s)
4	Save and commit all changes

How plans can be used

Usually plans are used to categorize locations or groups of locations. For example plans could be buildings across your organization, floors within a building or rooms in a building. SureTrend can hold up to 100 plans so it would not be wise to use them as the physical locations you test with a unit.
